

QUALITY & INNOVATION

Equipment for functional training made in Europe.

Technically advanced, reliable and resistant, with the possibility of customization. Years of research, development and design experience have resulted in KingsBox being one of Europe's best-known functional equipment suppliers.

All products are manufactured with the help of modern technology: laser-cut and welded with robotic welding and CNC lathes to guarantee maximum precision and thus achieving high quality.

High quality and attention to details

The quality of the equipment is apparent not only in the refined look but also in the reliability, safety and convenient use of the modular properties. The training tools have been designed and built to withstand all training conditions and last a lifetime.

Certificates and materials

Only certified materials are used for the manufacturing of our products, as well as qualified and specialized personnel, as required by European regulations. Because of the close collaboration of the design and the production team it is possible to combine quality, functionality and refined design in every one of our products.

KingsBox general warranty

We offer different warranty periods on our products ranging from a standard 2-year warranty up to a lifetime warranty. Contact us for more information.

DELIVERY & SHIPPING

Shipping time

The goods will be shipped to customers in the shortest possible time, although usually the goods are shipped to customers within 24-48 hours (working days) of the confirmation of the order.

Courier

Shipments are carried out by the following shipping companies: BRT, Ceccarelli, Arco Spedizioni, GLS, and in some cases by private couriers.

Delivery method

Delivery is made within 24-48 hours of the shipment. The package will be delivered to the address provided by the customer during the ordering process.

METHODS OF PAYMENT

KingsBox's shop offers the following payment methods:

- Cash on delivery (only in cash, up to a maximum limit of €2990)
- Bank transfer to the account of TNG Oprema d.o.o.
- PayPal (info@kingsbox.it)
- ATM card or credit card
- Leasing (Grenke Leasing)

OUR MISSION:

Giving people a playground to develop into the best version of themselves.
Delivering products that inspire masses in the gym industry.

OUR VISION:

A world where every single one of us is equipped to reach their full potential.

WHO WE ARE?

2015

Born in a garage

Our story began when two friends – Dejan And Luka started making equipment in their garage. In only 7 years it grew into one of the largest providers of sport equipment in Europe and a company with more than 60 employees! Since the beginning, our main values are developing people's full potential and making new innovative products. And we are not stopping!

VALUES:

We are always looking for opportunities for growth, for improvements and innovations, so this are the values that represent us best.

**Driven by innovation.
Devoted to growth.
Going the extra mile.**

RIGS & RACKS

ABOUT OUR RIGS & RACKS

HOME SERIES 50 X 50 MM PROFILE

ROYAL SERIES 60 X 60 MM PROFILE

MIGHTY SERIES 80 X 80 MM PROFILE

The third series, which was presented only two years ago, is the Home Series made from 50X50X3mm profiles, available for racks only. This series is dedicated to home gym owners. With the user's budget in mind we kept the design simple and rather focused on functionality and quality.

All our racks and rigs are completely modular, meaning that as you grow, the gym grows with you too.

Technically advanced, reliable and resistant, with the possibility of customization. Years of research, development and design experience have resulted in KingsBox being one of Europe's best-known functional equipment suppliers.

All Rigs and Racks are manufactured with the help of modern technology in order to guarantee maximum precision and high quality.

KingsBox Rigs and Racks are made in Europe (Slovenia). All the equipment in the design phase goes through the prototyping phase, which usually takes a few months to complete.

Once the product has been defined, it is firstly tested by our technical staff and then sent to our best athletes, who assess the product while remaining objective in the evaluation. Thanks to them we can strive for the continuous improvement of all our tools. The last step is putting the product into serial production and for sale.

The quality of the products and the notion of being able to offer one of the best services in the field is not just a written idea for advertising purposes, but primarily a fact and a promise, which we are committed to keeping on a daily basis.

All products have a warranty period, during which the item can be replaced or returned.

Our hot zinc plated rigs and racks are made for outdoor use, so you can even mount them at the beach, in your back yard or on the parking lot in front of your gym without worrying about weather conditions. Sunshine, rain, snow, or a tornado – worry about your house and your safety, but certainly do not worry about our Rigs or Racks. You can choose between a range of colors: Gold, Red, Blue, Green, Yellow, Orange, Grey, White, or Black.

Grip

We usually get the best suggestions for improvements when talking to athletes who use our equipment. Three years ago, in one of our first competitions, we talked with some athletes and we found out that they all had a similar problem - a bad grip on the pull up bars of the rig. It might sound like a small problem, but actually it was something that got in the way when they tried to show their full potential in competitions. So we returned home, and were determined to create a perfect coating for our pull up bars. One that offers a firm grip even without a large amount of magnesium, while at the same time is not too rough on the skin of one's palms. After months of researching and testing 138 different color samples and working with 29 color manufacturers, we discovered the right grip in 2016. We call it simply: KingsBox® Grip.

Today, this is one of the main reasons why more and more trainers are demanding KingsBox Rig for their gym or competition.

You can choose between 9 different standard colors: Gold, Red, Blue, Green, Yellow, Orange, Grey, White or Black.

Certificates

All our products are made exclusively from certified materials by a qualified and specialized personnel, as required by European regulations. Because of the close collaboration of the design and the production team it is possible to combine quality, functionality and refined design in every one of our products.

The Mighty series is made from 80X80X3 mm profiles and is designed to be our top-tier, maxed-out option for high-performance strength training.

All Mighty uprights have holes with laser-cut number markings, so you can quickly adjust the height of J cups, Angel arms, and 40 other Mighty accessories compatible with this series.

Our more economical series is the Royal series made from 60X60X3 mm profiles. This series is dedicated to those who want a more budget-friendly solution, but do not want to lose any functionality and quality. With number markings on every 5th hole, you can easily remember the perfect height for your back squats or bench press from the last training. This series is compatible with more than 20 different accessories such as Dip Bars, Angel Arms, Startup bars...

CUSTOM RIGS & RACKS

LOOKING FOR A STEEL CONSTRUCTION THAT WILL CREATE NEW TRAINING POSSIBILITIES?

Our designs can be adapted to your desires and training style. Of course, you will also be provided with tips and advice to make sure you choose the construction that best fits your needs. Why are the KingsBox constructions your best choice? The answer is because they can be fully custom-made!

The sky is the limit when it comes to designing and developing new structures. We are aware of the fact that many of our clients have problems with concrete pillars in the middle of the training area or drywalls that are not mountable, but that should not be a reason to panic. We have many existing solutions for such issues, but we can take problems on unknown grounds as well.

Let us know about your ideas and we will make them happen – first on paper with a 3D render, and if you are satisfied with the outcome, also with a realization of your Rig.

For more information, please write us on info@kingsbox.it.

IT'S VERY SIMPLE: WHEN
A CLIENT HAS A PROBLEM,
WE SOLVE IT.

Available upon order: info@kingsbox.it

OUTDOOR

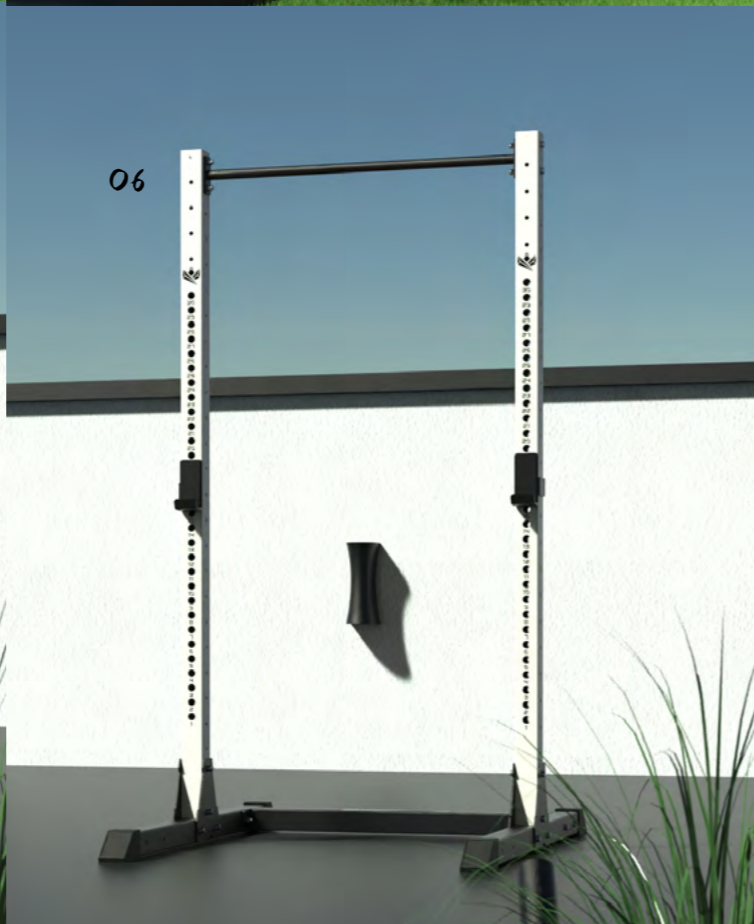

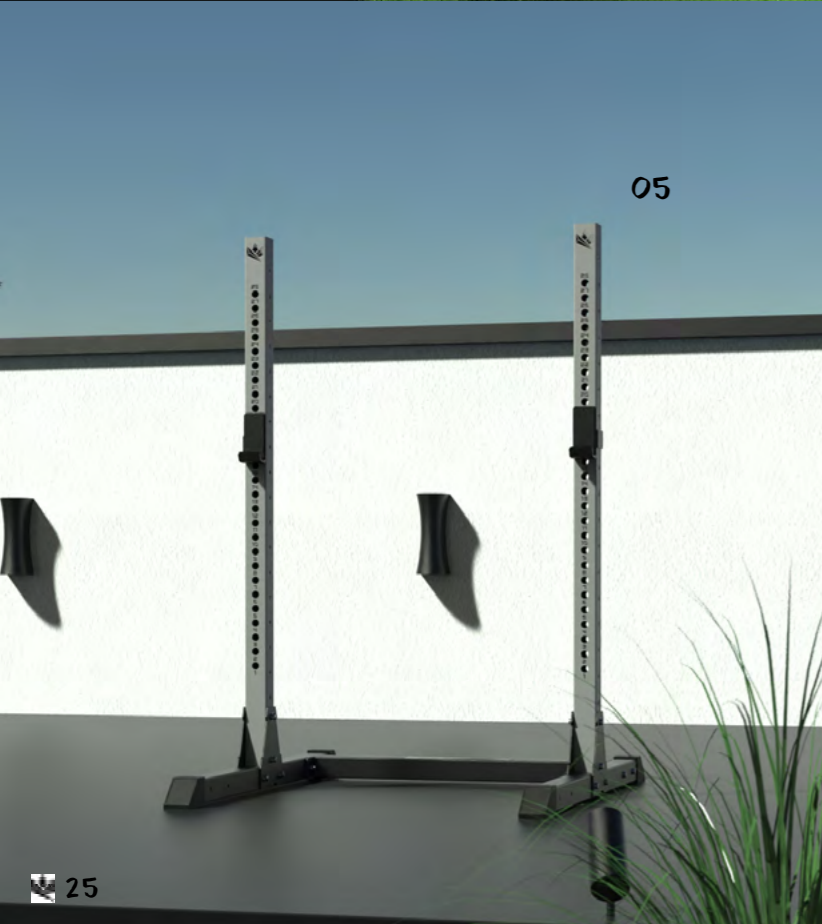

Warmer days are perfect for training outside, under the sun and in the fresh air, wouldn't you agree? Since we know how it feels to train inside a sweaty place, trying to catch some air between the reps, we decided to design this outdoor rig that will satisfy even the most demanding athletes and their needs.

ONE PERSON GYM SET

02

We were looking for a practical and economical solution for small studios and home gyms. That is how we came up with the idea for Studio Upright.

A 250 cm high upright column, that is fixed to the floor with safety bolts. It is compatible with all accessories from our Mighty series. That way you can choose the combination that best fits your type of training.

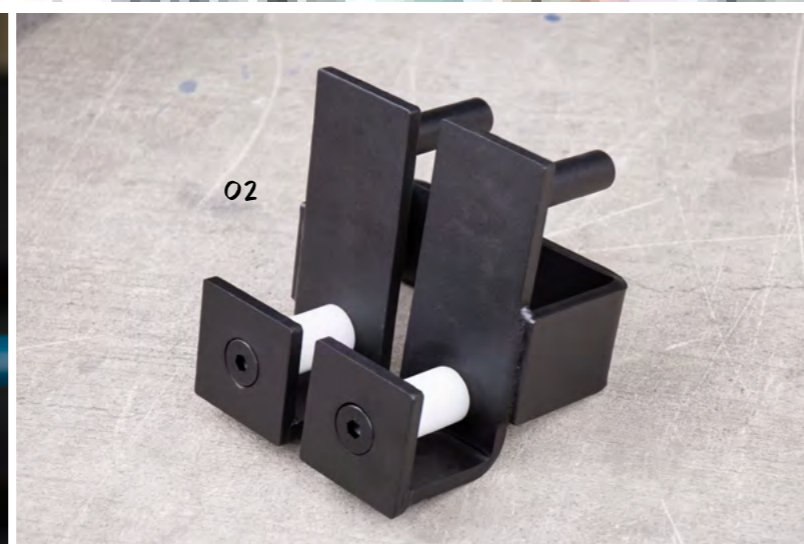

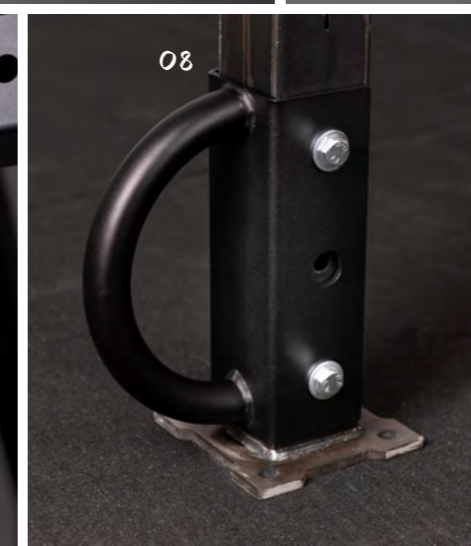

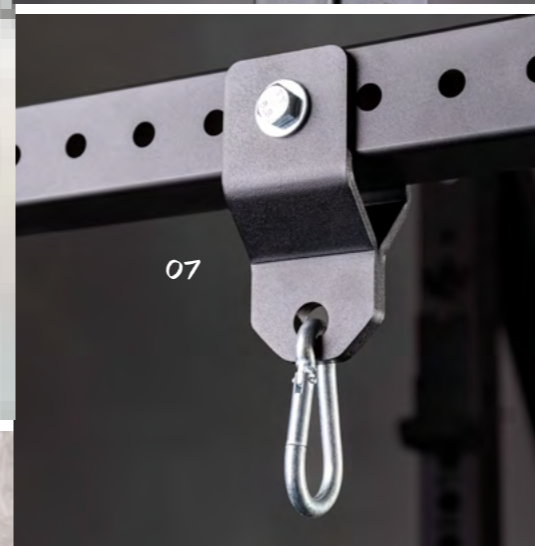

You can start with Startup Bar & Plyo Platform, and then add more accessories with time. Our quick fit system means you can easily switch between different accessories. This way you can have a simple one-column structure that does not take up much room but at the same time offers endless training possibilities.

KINGSBOX CLOSET GYM

01

Inside the Closet

Stored in the closet you will find our famous Royal TNT rack with the adjustable Pull-Up Bar and a Folding Bench, Barbell hanger, and bumper storage. A perfect all-around training station on which you can train both pull-ups and do your barbell exercises.

Custom Exterior Design

The product is designed and made in Europe.

To make sure the Closet Gym will match the interior design of your apartment, you can choose between numerous color options from the catalog.

The feedback that we have got so far is amazing and we are happy to announce that the orders for our new Home Gym Closet are open !

A close-up photograph of a grey metal panel from a KingsBox MAD Series machine. The panel features a repeating pattern of small, stylized 'K' logos. A white brushstroke graphic is overlaid on the panel, containing the text 'KingsBox®' and 'MAD SERIES' in a bold, yellow font. The 'KingsBox' text is positioned above the 'MAD SERIES' text. The background shows the mechanical components of the machine, including a metal rod and a circular opening.

KingsBox®

MAD SERIES

KingsBox

THE MAD KING

A leg press machine designed for the real kings and queens

As the very name suggests, the leg press is a strength fitness device designed to perform the leg press exercise in a safe and controlled way.

Usually, each person has a dominant side of the body, for example, their right leg. When lifting, that dominant side takes up the larger share of the load. This means that the dominant side becomes even stronger and the difference between both legs becomes even greater. That is why we designed The Mad King - so that that plates can be pushed simultaneously with both legs or they can be separated and the trainee can train each leg individually.

Made in Europe

The device is made of profiles measuring 80 x 80, which have already been tested and are recognized as a KingsBox trademark. The profiles are connected by steel plates, which serve as an excellent connecting element and at the same time give the product the industrial and mighty look, which is a distinguishing feature in the KingsBox equipment.

Overcome the difference between both legs

The Mad King allows you to completely isolate your leg muscles and prevents the dominant leg from taking on the majority of the load. This is helpful for beginners that are not skilled enough to perform squats, for athletes recovering from injury, and also for those who want to completely isolate their leg muscles for optimal strengthening.

KB06MI-002-10

Scan & check

THE CRAZY QUEEN

We wanted to stay with our industrial style of design, so we used 80x80 profiles and cutout details that are typical for our equipment. The idea is that the design of the machine matches the rest of your gym.

Like with Mad King you can train each leg separately, preventing the dominant leg from taking the major part of the load. Thus you can work to minimize the difference between both legs. Crazy Queen is a plate-loaded machine. To add weight you use standard weight plates with a 50 mm hole diameter.

Crazy Queen will be most happy by the Mad Kings side. Both machines focus on building leg muscles. While the Mad Kings focuses on the leg press exercises, you can do two different exercises with the Crazy Queen.

One is seated leg extension with which you build your quadriceps muscles. But with a quick shift of the seating, you can also perform a lying leg curl. This exercise is focused on the posterior thigh muscle but it also helps train gluteus and hip flexors.

It comes in a grey-gold combination but if you would like it in a different color combination we can make it. Just write us at info@kingsbox.com.

YOUR GYM IN ONE MACHINE. MIGHTY SPS

SQUAT PULLY SYSTEM

It was a September afternoon. While we were sweating in our 'Office Gym' we came up with an ingenious idea: 'Why not design one training machine where you could complete your whole training routine?'. The idea was simple, but the realization – not so much! 9 months later, after prototyping and testing, we had our final product: The Mighty Squat Pulley System.

Mighty Squat pulley is a unique patented machine, on which you can perform belted squats, lat pulls, cable rows, and many other exercises for strength training. Now it's easier to understand its slogan: » Your gym in one machine.

The Mighty SPS is also available in shorter version called Mighty SPS – Base. It's perfect for Sport facilities or personal studios that are space limited.

The color of uprights is customizable. You can choose between Gold, Red, Blue, Green, Yellow, Orange, Grey, White or Black.

CERAKOTE

TRANSFORMING BARBELLS INTO ART

COLORS AVAILABLE

Since we are continuously setting new standards regarding quality and innovation of the Olympic barbells, it is time to present our Cerakote bars. This ceramic and polymer coating specifically enhances a number of physical performance properties including abrasion/wear resistance, corrosion resistance, chemical resistance, impact strength, and hardness. After a series of tests, the performance of Cerakote is seventy times better than chrome and even a hundred times better

than black zinc. Considering that this ceramic coating is used to coat military weapons, it is certainly good enough for our barbells. Olympic and powerlifting bars are inherently very robust, but with Cerakote coating, the durability is even more enhanced. You can choose between Black, Red, Blue, Pink, Yellow, Green, Grey or White, or the special colors White Sky, Blue Sky, or Pink Sky.

THE C-BAR CELIA GABBIANI

The C Bar Women's Olympic Barbell

- | Article no: KX-010-6010
- 15kg/ 25mm
- 195k PSI
- Dual knurl marks, No Center knurl
- Excellent knurling arrangement for functional workouts
- 4 needle roller Bearings
- Titanium Coating

The C Bar Men's Olympic Barbell

- | Article no: KX-010-6000
- 20kg/ 28mm
- 205k PSI
- Dual knurl marks, No Center knurl

- 4 needle roller Bearings

Royal Bar Olympic Barbell

- Article no: X-010-1100
- 20kg/ 28mm
- 215k PSI
- Dual knurl marks, No Center knurl
- Excellent knurling arrangement for functional workouts
- 8 needle roller Bearings

White Knight Bar

- Article no: X-010-1300
- 20kg/ 28mm
- 205k PSI
- Dual knurl marks, No Center knurl
- Suitable for Powerlifting and Olympic weightlifting
- 4 needle roller Bearings

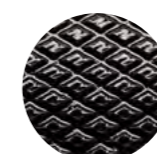

The Great WL Bar Olympic Barbell

- Article no: X-010-1500
- 20kg/ 28mm
- 215k PSI
- Olympic Weightlifting knurl marks, Center knurl
- Suitable for Olympic weightlifting
- 8 needle roller Bearings
- Hard Chrome Coating

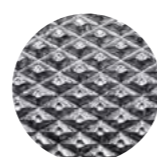

The Great Bar

- Article no: X-010-1200
- 20kg/ 28mm
- 205k PSI
- Dual knurl marks, No Center knurl
- Suitable for Powerlifting and Olympic weightlifting
- 4 needle roller Bearings

Royal WL Bar Olympic Barbell

- Article no: X-010-1510
- 20kg/ 28mm
- 215k PSI
- Olympic Weightlifting knurl marks, Center knurl
- Suitable for Olympic weightlifting
- 8 needle roller Bearings
- Hard Chrome Coating
- Fine rough knurling
- Handmade knurling

Power Warrior Bar

- Article no: X-010-1200
- 20kg/ 29mm
- 205k PSI
- Powerlifting knurl marks, Center knurl
- Suitable for Powerlifting
- Bushings
- Hard Chrome Coating

Royal Deadlift Power Bar

- Article no: X-010-1800
- 20kg/ 28,5mm
- 190k PSI
- Powerlifting knurl marks, No Center knurl
- Suitable for Powerlifting
- Bushings
- Black Zinc Coating
- Aggressive knurling

Gold Bar

- Article no: X-010-6100
- 20kg/ 28mm
- 205k PSI
- Dual knurl marks, No Center knurl
- Suitable for Powerlifting and Olympic weightlifting
- 8 needle roller Bearings
- Titanium Coating
- Medium rough knurling

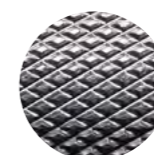

Underground Power Bar

- Article no: X-010-1700
- 20kg/ 29mm
- 230k PSI
- Powerlifting knurl marks, Center knurl
- Suitable for Powerlifting
- Bushings
- Hard Chrome Coating
- Aggressive knurling

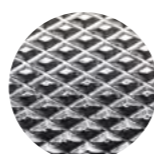

Longbow Bar

- Article no: X-011-7000
- 20kg/ 28mm
- 205k PSI
- Powerlifting knurl marks, Center knurl
- Suitable for Powerlifting
- 4 needle roller Bearings
- Hard Chrome Coating
- Medium rough knurling

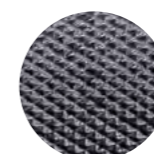

KingsBox Russian Bar

- Article no: X-010-5000
- 20kg/ 28mm
- 190k PSI
- Dual knurl marks, No Center knurl
- Suitable for Powerlifting and Olympic weightlifting
- 8 needle roller Bearings
- Hard Chrome Coating
- Medium rough knurling

The Mad Bar

- Article no: KB14MB-003
- 20kg/ 28mm
- 180k PSI
- Dual knurl marks, No Center knurl
- Bushings
- Cerakote Coating
- Medium rough knurling

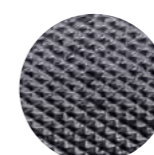

Wicked Bar

- Article no: X-011-8000
- 20kg/ 28mm
- 190k PSI
- Dual knurl marks, No Center knurl
- Suitable for Powerlifting and Olympic weightlifting
- 8 needle roller Bearings
- Hard Chrome Coating
- Medium rough knurling

The Mad Bar

- Article no: KB14MB-004
- 15kg/ 25mm

GYM DESIGN AND SPECIAL PRICES

We schedule a call with you. You tell us your wishes and desires, and we deliver a 3D drawing of your future gym. If your order exceeds 4000€ you will also get a very special discounted pricelist.

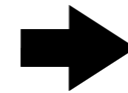

MADE IN EU

After we agree on all the details, we put the products in production. If requested, we offer also leasing financing.

SHIPPING WITHIN 72H

For all orders above 1990€, the shipping costs are on us! The products are ready for shipping, usually within 24-72h, while 90% of all our products are usually in stock. The waiting time for custom made products extends to 4-6 weeks, after the confirmation and received 30% prepayment of the order.

ENJOY YOUR NEW GYM

Even after the purchase, our customer support team is always at your disposal. All our products have at least a two-year warranty, some even a lifetime warranty.
